

Sugar Gloss Small Fruited Tomato

Very sweet and full of flavor. This cherry tomato grows in double trusses. Best started indoors under lights BUT since it finishes early you can start in outside preferably in a cold frame or under a hoops covered in plastic. Grows best at 21-24° C or higher. Incorporate manure or compost 30 cm deep. Apply a general fertilizer before planting. SPACING: Set out 45 to 60 cm apart in rows 90 cm apart. Canada No. 1 97% Germination.
