

## Mountain Glory Tomato

An early finisher that produces heavy yields of large, round deep red fruit. Mountain Glory lends itself well to stake

cultivation. Resistant to Fusarium Wilt (races 1,2), Verticillium Wilt (race 1) and Tomato Spotted Wilt Virus. Canada No. 1

Plant seeds just under the top of rich soil. Starting indoors under lights is best BUT, this variety finishes early and can be planted outside directly when it's warm. Cover with a cold frame or a hoop house if possible to decrease germination time and tomatoes like heat. Stake and harvest in the fall.

92% Germination.
