

## **GIANT WINTER SPINACH**

### **Seeding Depth**

1/8-1/4"

### **Plant Spacing**

For babyleaf ~40seeds/ft" in 2-4" bands, for bunching 2"

### **Row Spacing**

For babyleaf space bands 1-2" apart, for bunching 12-18"

### **When to Sow**

Direct seed as soon as soil can be worked in the spring, and again in the late summer-early fall. Greenhouse spinach is sown in early fall to give just enough time to germinate and produce a modest amount of leaf, but not grow so fast as to require a lot of upkeep. Seed germinates best when soil temperatures are 32-60°F and achieves the best quality when air temperatures are 55-60°F. Sow every 7 days for a continual harvest.
